

# Globalization Working Group

- Issues:
  - How will the field operate in an internationalized future?
  - What new organizational structures are needed?
  - How does the U.S. maintain a strong program in this context?
- Members:  
V. Boisvert, J. Krane, G. Moorgart-Pick, T. Nunnemann, M. Palmer, M. Toharia, W. Walkowiak

# Globalization Working Group

Results from Snowmass (survey and straw polls):

- **Relative unawareness of international groups studying the future of the field** and the impact of even higher internationalization among young physicists (YP).  
Need for (self-) education.
- For the organization of the one next international energy-frontier project YP favor a **"very large shared project"** as structure.
- **Issue of "regional centers"** needs further exploration and discussion.
